PROFESSIONAL SUMMARY

Full Stack AI Developer with hands-on experience building responsive, scalable web applications and AI-powered features using React.js, Node.js, Express.js, and MongoDB. Skilled in integrating AI/ML-driven functionality, RESTful API development, and frontend-backend integration, along with implementing secure authentication and role-based access control. Experienced in debugging, testing, and optimizing full-stack applications, with a focus on clean, maintainable architectures. Proven ability to deliver production-ready, AI-enhanced applications using Docker and CI/CD.

EXPERIENCE

Freelance Full Stack Developer

Mar 2025 – Apr 2025

Client Project – Internship & Training Platform

- Developed a full-stack internship and training platform using the MERN stack, supporting user enrollment, structured training programs, live session links, and recorded content access while building scalable RESTful APIs and secure backend architecture.
- Built role-based dashboards for admins and instructors, covering training management, user enrollment tracking, and automated certificate generation triggered by instructor approval, with secure JWT authentication and RESTful API integration.

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), Python
- Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Context API (State Management), Responsive Design
- Backend:** Node.js, Express.js, RESTful APIs
- Databases:** MongoDB (NoSQL), PostgreSQL, MySQL
- Tools & Platforms:** Git, GitHub, Docker, Postman, CI/CD
- Testing & Debugging:** Debugging, Testing, Performance Optimization
- Authentication & Security:** JWT Authentication, RBAC, Secure API Development, OWASP Basics
- APIs & Libraries:** Axios, Fetch API

PROJECTS

AI-Powered Career Companion System | GitHub | Live Demo

- Developed and deployed an AI-powered Career Companion System using the MERN stack that matches resumes with job descriptions and generates ATS compatibility scores by identifying matching and missing skills.
- Implemented an intelligent skill gap analysis module that provides prioritized recommendations and personalized learning paths, with proper API design, validation, and optimized backend performance.
- Built a mock interview system that generates role-specific questions and answers using AI, deploying the application for real-world usage with a scalable architecture.

Fashion E-Commerce Platform | Github | Live Demo

- Developed and deployed a scalable MERN-based e-commerce platform for browsing and purchasing fashion products, featuring JWT-based authentication and role-based access control.
- Implemented product catalog, advanced search and filtering, cart and order management, and integrated Razorpay payment gateway with secure transaction handling, order validation, and failure handling.

Business Portfolio & Digital Presence Platform | Github | Live Demo

- Developed and deployed a modern business portfolio and digital presence platform using the MERN stack, showcasing services, projects, and client testimonials through a responsive, SEO-optimized design.
- Built dynamic content management for business profiles, service listings, and contact/inquiry handling, with optimized performance, RESTful APIs, smooth UI animations, and secure deployment via CI/CD.

EDUCATION

B.E – Information Science | VTU

2022–2026

Yenepoya Institute of Technology
